

MADDY RINGO

Folk singer-songwriter

"Mellifluous, honey-like..."

Since picking up a music career through busking on the streets of Toronto, Maddy Ringo has been a fresh voice in the timeless tradition of American folk music. The daughter of a born-and-bred Canadian and an American peacenik, Maddy learned the *Rise Up Singing* catalogue as a seven-year-old, creating her foundation in the works of Joan Baez, Arlo Guthrie, Bob Dylan, and the like. Now, based in Ann Arbor at the University of Michigan, she brings a modern spirit to the folk format, with her multi-instrumental songwriting, jazz inclinations, and rich mezzo vocals. Her latest album "People of the Earth and Sea" explores vivid narratives of faith, earth, and finding meaning in an ever-changing world. Her tour highlights include headlining renowned folk venue The Ark, as well as opening for The Accidentals at Ann Arbor's annual *Sonic Lunch* concert series.

REVIEWS

"Maddy Ringo has quickly become a favorite recurring act of the venue. Her ability to connect with you through her mesmerizing voice and heart wrenching lyrics accompanied by her laid-back, humorous stage presence has you leaving feeling like she's an old friend. She's an immense talent whose career we look forward to watching."

- *North Star Lounge, Ann Arbor*

"It is these parts of humanity to which Ringo speaks most accurately: the common threads that tangle us together, the fractured understanding of self in a digital world, and the craving for wholeness when only sold fast food...She's a Joni Mitchell for the modern age, a budding Ann Arbor starlet, and a breath of fresh air for all folk lovers."
